

ENERGY STAR HOMEOWNER BENEFITS

Peace of Mind

Home buying is complex enough without having to know all the details of energy-efficient construction. Instead, the government-backed ENERGY STAR logo lets you easily identify homes that are truly energy efficient.

Find the house of your dreams and enjoy peace of mind knowing that it also meets strict energy efficiency guidelines set by the U.S. Environmental Protection Agency.

Lower Ownership Costs

Compared with standard construction, ENERGY STAR qualified homes use substantially less energy for heating, cooling, and water heating — delivering \$200 to \$400 in annual savings. Over the average 7 to 8 years you may live in your home, this adds up to thousands of dollars saved on utility bills. Additional savings on maintenance can also be substantial.

Better Performance

Properly installed energy-efficient improvements deliver better protection against cold, heat, drafts, moisture, pollution, and noise. An energy-efficient home helps to ensure consistent temperatures between and across rooms, improved indoor air quality, and greater durability.

Smart Investment

By the end of the decade, more than 2 million homes are expected to earn the ENERGY STAR. The trend is clear. By choosing a home with the ENERGY STAR, you can be confident that it will have an increasingly valued feature when the time comes to sell.

Environmental Protection

Did you know that your home can be a greater source of pollution than your car? In fact, about 17 percent of U.S. greenhouse gas emissions are generated from the energy used in houses nationwide. Energy used in our homes often comes from the burning of fossil fuels at power plants, which contributes to smog, acid rain, and global warming. Simply put, the less energy we use in our homes, the less air pollution we generate. Homes that earn the ENERGY STAR prevent greenhouse gas emissions by meeting strict energy efficiency guidelines set by the U.S. Environmental Protection Agency.
